Call Center AI Operating Model

A 12-month transformation blueprint for the multi-brand contact center

CLIENT	BRANDS	PREPARED BY	REVISION
Doğuş Otomotiv	Volkswagen · Audi · Škoda · SEAT · Porsche · Bentley · Lamborghini	Freya Labs, ML Performance & Voice	1.1 · April 2026

01 Engagement Frame

Scope, baseline, and the one-line thesis we are testing.

THESIS

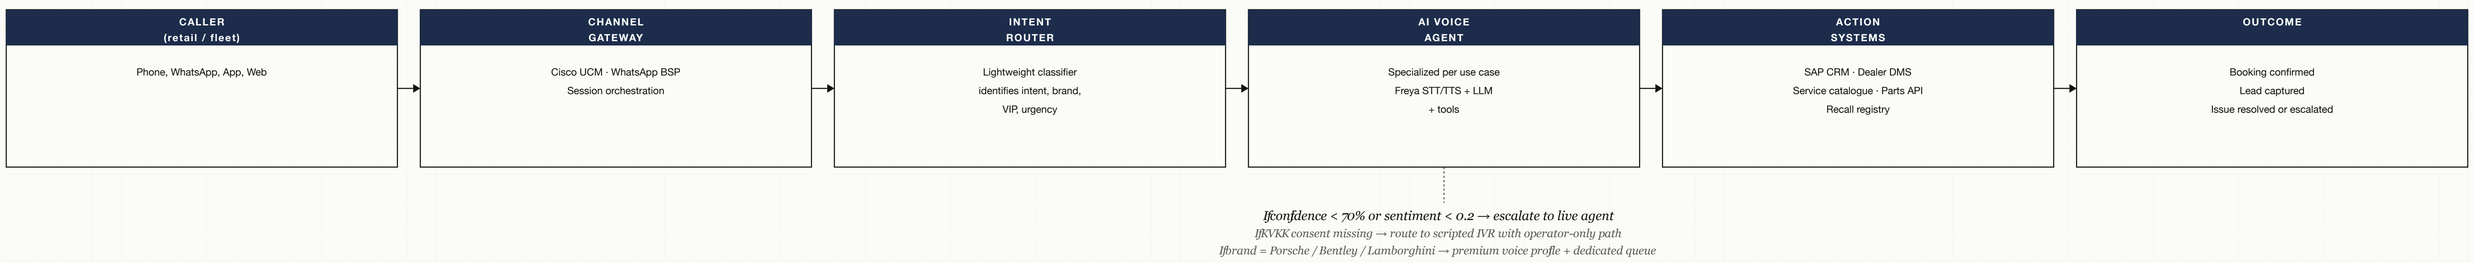
A specialized voice agent layered on top of the existing contact center can absorb 70% of inbound volume in 12 months, while lifting service-channel revenue by 22% via outbound automation, at a 45% lower cost-to-serve and without dealer disruption.

BASELINE FACTS (FY 2025)

Inbound calls / year, group-wide	≈ 12.4 million
Inbound calls / year, service-only	≈ 6.8 million
Outbound calls / year (NPS, recall, reminder)	≈ 2.1 million
Live agents / FTEs (in-house + dealer BDC)	≈ 1{,}450
Average inbound handle time, all intents	4 min 12 sec
Service-appointment requests / year	≈ 3.1 million
Roadside / emergency calls / year	≈ 380{,}000
Active recall campaigns Q1 2026	11

02 Operating Model

Single horizontal flow from caller to outcome, with the AI tier sitting between the IVR and the dealer DMS.



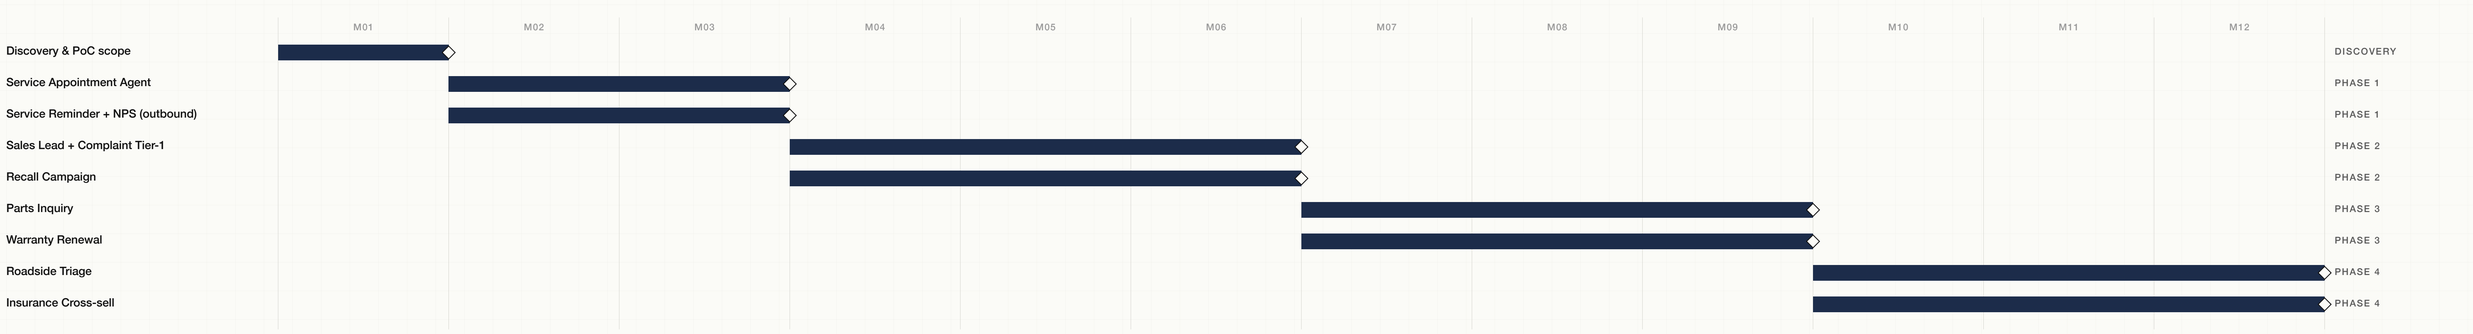
03 AI Agent Matrix

Ten specialized agents. Each owns one intent, end to end.

AGENT	DIRECTION	CHANNEL	PHASE	AHT TARGET	CONTAINMENT	PRIMARY KPI	SECONDARY KPI
Service Appointment	Inbound	Phone, WA, App	Phase 1	85 s	70%	Booking conv.	Reschedule rate
Service Reminder	Outbound	Phone, WA	Phase 1	55 s	n/a	Service revenue	Pickup rate
NPS / CX Survey	Outbound	Phone, WA	Phase 1	70 s	n/a	Closed-loop CX	Detractor follow-up
Sales Lead Qualifier	Inbound	Phone, Web	Phase 2	110 s	55%	MQL→SQL conversion	Test-drive booked
Recall Campaign	Outbound	Phone, SMS	Phase 2	75 s	n/a	Recall completion %	OEM compliance
Complaint Tier-1	Inbound	All channels	Phase 2	95 s	60%	Complaints logged %	Resolution within SLA
Parts Inquiry	Inbound	Phone, WA	Phase 3	90 s	65%	Order conversion	Stock-check accuracy
Warranty Renewal	Outbound	Phone, WA	Phase 3	100 s	n/a	Renewal rate	Extended-warranty upsell
Roadside Triage	Inbound	Phone	Phase 4	65 s	40%	Time-to-dispatch	Customer reassurance
Insurance Cross-sell	Outbound	Phone, WA	Phase 4	120 s	n/a	Bind rate	Cross-sell margin

04 Phased Rollout

Twelve months. Each phase carries a quantified gate before the next opens.



GATES (END OF EACH PHASE)

M1 → Phase 1	Compliance sign-off, mock-API ready, 100 reference calls captured
M3 → Phase 2	Containment ≥ 60% on Service Appointment, CSAT ≥ 4.0, zero P0 incidents
M6 → Phase 3	WER < 8% sustained, 4 brands live, dealer council unblocking changes
M9 → Phase 4	Cost-to-serve −30%, NPS uplift +10, Porsche queue accepted by brand owner
M12 → Steady state	Cost-to-serve −45%, 70% containment, 24/7 SLA 99.5%, recall coverage 100%

05 KPI Scorecard

What we measure, where we read it, and what good looks like at month 12.

METRIC	DEFINITION	BASELINE	MONTH 3	MONTH 6	MONTH 12	READ FROM	OWNER
Containment	% inbound calls resolved end-to-end by AI	0%	60%	65%	70%	Langfuse + CRM disposition	Freya Delivery
Avg. Handle Time	Mean inbound call duration, all intents	252 s	150 s	110 s	<90 s	Telephony CDR	Doğuş Ops
CSAT	Post-call survey, scale 1–5	3.6	4.0	4.2	≥ 4.3	Freya outbound NPS bot	Doğuş CX
Net Promoter Score	Standard 0–10 NPS, calculated quarterly	+24	+30	+35	+39	Quarterly NPS programme	Doğuş CX
24/7 Availability	p50 service availability across calendar year	92%	97%	99%	99.5%	Datadog uptime monitor	Freya SRE
Cost-to-Serve	Fully-loaded cost per resolved customer interaction	TRY 38	TRY 26	TRY 22	TRY 21	Finance reconciliation	Doğuş Finance
Service Revenue	Service-channel revenue lift attributable to outbound bot	Index 100	Index 108	Index 116	Index 122	DMS reporting	Doğuş Service
Recall Coverage	% of eligible base contacted within campaign window	62%	85%	95%	100%	OEM recall registry	Doğuş Compliance

06 Decision Rights

Who is Responsible, Accountable, Consulted, Informed. RACI without ambiguity.
